OFFERING #1

SEEDLINGS IN COMMUNITY POTS

Explanation of Policy - Please read carefully.

SEEDLINGS IN COMMUNITY POTS. Our hybrid seedlings are planted in communities of approximately 5 to 15 plants per pot. The plants are approximately two years old from seed and are in need of transplanting within three months. The price shown on the offering is the price per plant. Since they are in communities we cannot accept an order for less than 10 plants of any one cross. We can only approximate your order since it is not always possible to find a pot containing exactly the same number of plants you may request.

SEEDLINGS IN INDIVIDUAL POTS. These seedlings are in individual pots and they may be purchased in any quantities unless purchase limitations are specified.

SUBSTITUTIONS. We would like to have our customers give us a second choice to be sent in the event we are sold out of plants of their first choice. No substitutions are made unless authorized.

BACK ORDERS. In the event that we are permanently sold out of a cross when your order is received you will be advised. If a second choice is specified, it will be shipped. If we are temporarily sold out of a cross you request, your order will be back ordered and the plants shipped when they are ready.

PAYMENT. Please DO NOT include payment with your order. Payment should be made upon receipt of our invoice or upon acknowledgment of your order. Prices shown are in U.S. dollars F.O.B. Chattanooga.

SHIPMENTS. U. S. shipments will be made by Railway Express unless otherwise requested. All foreign shipments will be sent by Air Mail or Air Express depending on weight, unless otherwise requested.

FIBRE POTS. For the benefit of our foreign customers we are prepared to ship your plants in fibre pots without any extra charge. This will result in saving of from \$0.25 to \$0.50 per pot on mail or express charges. The plants should be repotted into clay pots within about 2 or 3 weeks. Plants will be shipped in clay pots unless otherwise requested.

| <u>CROSS NUMBER</u> | <u>Name of Cross, Expectancy and Description of Parents</u> | <u>PRICE PER PLANT</u> |
|---------------------|--|------------------------|
| R-644 | <p>C. KIENASTIANA SANDERAE X C. NUTLEY, alba Spring blooming white with colored lip. C. Kienastiana (C. Dowiana x C. Luddemanniana) A summer blooming plant having flowers of medium heavy substance. Petals and sepals are cream white with a ruffled edged crimson lip and large golden eyes.</p> <p>C. Nutley, alba (C. Harold x C. Hardyana), one of the better known spring blooming whites with colored lip.</p> | \$1.50 |
| R-657 | <p>C. DIONYSIUS, alba X LC. HASSALLII, alba Free flowering summer blooming white with colored lip. C. Dionysius, alba (C. Fabia x C. gigas, F.M.B.) An August blooming plant having large well shaped blooms of good form and texture. Petals and sepals are white and the long graceful lip is of a bright rose color with large yellow eyes. This plant produced 25 flowers over the last 5 year period and had 5 flowers on one spike during one year.</p> <p>Lc. Hassallii (Lc. Britannia x C. gigas). An August blooming plant having large blooms of good form and heavy texture. The petals and sepals are pure white with long white lip having a deep purple tip. This is also a free flowering plant known to have 4 flowers on one spike.</p> | \$1.50 |
| R-669 | <p>BL.C. CONSUL GREIG X C. DOWIANA A good yellow blooming in late summer. Blc. Consul Greig (Blc. Golden Crown x Lc. Thyone), having fine yellow blooms of good texture and form in consecutive years. Deep yellow sepals and petals with a light rose lip and a yellow veined throat.</p> <p>C. Dowiana, a good plant having good blooms with cream sepals and petals and a rose lip with a gold veined throat.</p> | \$1.25 |
| R-675 | <p>C. SNOWSONG, var. Rivermont X C. CELIA, var. Rivermont A good free flowering white of exceptional texture blooming in the fall.</p> <p>C. Snowsong (C. Loddigesii x C. Snowdon). A free flowering small white of waxy texture and very good form. Pure white petals, sepals and ruffled lip with a golden throat, known to have 5 flowers with 5 1/2" spread on one spike.</p> <p>C. Celia (C. Harrisoniana x C. Lady Veitch), pure white with a canary yellow throat. This flower has exquisite form. The petals are so broad they are almost round.</p> | \$1.25 |
| R-676 | <p>LC. DERRYNANE X LC. H. G. ALEXANDER, F.C.C. A superior lavender hybrid blooming in the fall. Lc. Derrynane (Lc. Balkis x Lc. Princess Margaret) A strong growing plant producing large dark lavender flowers of very good form and heavy texture.</p> <p>H. G. Alexander (Lc. Malock x Lc. Momus) This plant received a First Class Certificate at the Royal Horticultural Society for the quality of its flowers. Lovely lavender petals with small splash on tip. Large rose lip with yellow eyes.</p> | \$2.50 |

| CROSS NUMBER | Name of Cross, Expectancy and Description of Parents | PRICE PER PLANT |
|--------------|---|-----------------|
| R-679 | BL.C. XANTHEDO X LC. LUMINOSA We expect a very good yellow that will bloom in the late fall. This cross will be particularly desirable for commercial growers. It should bloom later than most yellows and furnish flowers for Halloween when yellows are scarce with some spreading into the month of December. Blc. Xanthedo (Blc. Xanthea x Lc. Mrs. Medo). The blooms have heavy textured orange petals and sepals with a rose lip. Lc. luminosa (C. Dowiana x L. tenebrosa) A hardy, good growing plant producing very large blooms. The flowers on this plant were of large size, good form, and heavy texture. The petals and sepals were reddish bronze while the lip was of a deep reddish purple. The blooming record on this plant shows 2 good 12/43 - 3 good 10/44 - 3 good 11/45 - 2 good 1/47 - 4 good 12/47. | \$1.50 |
| R-680 | LC. DERNA X LC. LUMINOSA One of the best yellow hybries blooming in the fall. Lc. Derna (C. Dowiana, aurea x Lc. Nugget.) This is one of our best known yellow hybrids. The blooms are of large size, good form and heavy texture. Petals and sepals are yellow. The lip is spade type with a ruffled edge and colored a deep rose. Lc. luminosa (Same as parent of R-679) | \$2.00 |
| R-682 | C. CHARYBLIS X BC. BRITISH QUEEN We expect a tradionally English lavender hybrid here to bloom in the fall. C. CHARYBLIS (C. Dinah x C. Chelsea) Bc. British Queen (Bc. Digbyano-Mendelii x C. Lord Rothschild) | \$2.00 |
| R-699 | C. BOW BELLS X C. MOSSIAE WAGNERI Little need be said about these two well-known plants. We expect a fine white that will bloom in the winter. C. Bow Bells (C. Edithae White Empress x C. Suzanne Hye) A phenomenal grower that produces blooms of unexcelled quality. Huge pure white petals of heavy texture and excellent form. The lip is large with a yellow throat. C. Mossiae Wagneri. | \$2.50 |
| R-706 | C. PETALENA, alba X BL.C. NANETTE, alba A fine white with colored lip to bloom in the fall. C. Petalena (C. Enid x C. Petersii) Heavy pure white petals and sepals, white lip with a rose tip and yellow eyes. Blc. Nanette (Blc. Everest x C. Annette) Heavy white petals and sepals with large fringed lip having a tiny splash of purple on tip. | \$1.50 |
| R-708 | C. BOW BELLS X C. CELIA, var. Rivermont A fine cross between two well-known pure whites. The resulting fall blooming hybrid should be a sturdy grower combining the fine qualities of Bow Bells with the snug shape of Celia. C. Bow Bells (C. Edithae White Empress x C. Suzanne Hye) One of the finest Bow Bells we have ever flowered. C. Celia (Same as parent of R-675) | \$2.00 |

| <u>CROSS NUMBER</u> | <u>Name of Cross, Expectancy and Description of Parents</u> | <u>PRICE PER PLANT</u> |
|---------------------|---|------------------------|
| R-738 | <p>C. ELEANORE, alba X C. HAROLD, alba A lovely white with colored lip that will bloom in the late spring. C. Eleanore (C. Hardyana x C. gigas, F.M.B.) A large flower with heavy pure white petals and sepals and a lovely rose lip with yellow eyes. C. Harold (C. gigas x C. Gaskelliana) Large flowers of fine shape and good substance. Petals and sepals are pure white. The lip is long and graceful with a deep rose tip and fringed with white. The throat has a bright yellow center.</p> | \$1.50 |
| R-739 | <p>C. LORANORE X C. HAROLD, alba A spring blooming white with colored lip. C. Loranore (C. Eleanore, alba x C. Lorna) A good growing plant producing lovely large flowers of good form and texture. The petals are pure white. The rose lip is long and graceful with a bright yellow center. C. Harold (Same as parent of R-738)</p> | \$1.50 |
| R-753 | <p>C. DIONYSIUS, alba x C. HAROLD, alba A spring blooming white with colored lip. C. Dionysius (C. Fabia x C. gigas, F.M.B.) Large flowers of lovely shape. Petals and sepals are pure white. The lip is long and has a rose tip that is outlined with a tiny white border. C. Harold (Same as parent of R-738)</p> | \$1.50 |
| R-765 | <p>Lc. NORSEMAN X C. THETIS, var. Rivermont We expect a good winter blooming dark lavender here. Lc. Norseman (Lc. Wellsiana x C. Monarch) Petals and sepals are dark and of good substance. The lip is very dark with a yellow center. C. Thetis (C. Delphin x C. Titrianae) Petals and sepals are lovely lavender with a tiny touch of purple on tips of petals. The lip is broad with a bright purple tip bordered by a lavender edge. This is a flower of superior shape.</p> | \$1.50 |

January 23, 1948

We are pleased to offer these seedlings in community pots. These are by far the largest and most vigorous seedlings we have ever grown.

Although our regular shipping season in the United States on all plants begins on March 15, we are able to ship community pot seedlings beginning February 1. This is possible by our selecting favorable weather during which we make shipments. We have experienced very few instances of frozen community pot seedlings since these are always well insulated with paper packing. In each of these cases the responsibility was accepted by the Railway Express Company or ourselves.
